TRADOCS Electronic Documents

Connecting Global Supply Chains

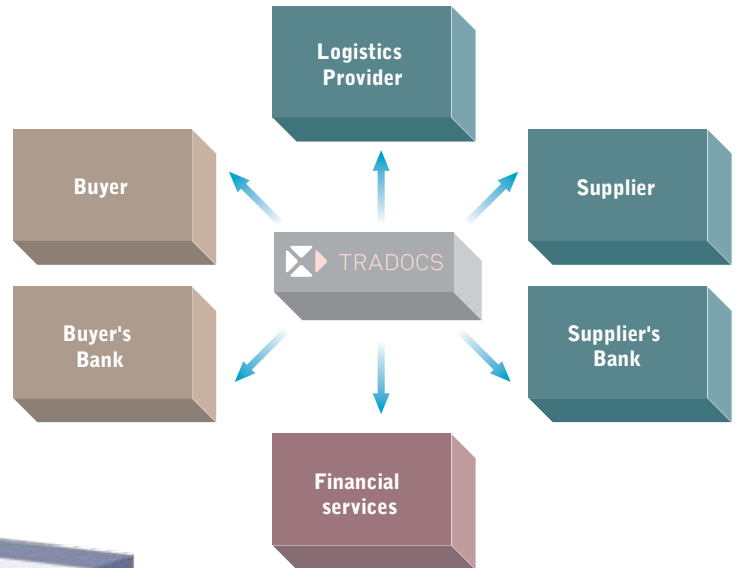

About Tradocs

Tradocs is a global trading system that enables businesses to trade electronically by exchanging documents - such as purchase orders and invoices- quickly and securely over the Internet. Registration is free and documents are sent on a pay-as-you-go basis immediately reducing document transfer and accountancy costs. Tradocs delivers its systems to a range of high profile clients within the manufacturing, retail, logistics, insurance, travel and banking sectors. In 2005 alone, transactions worth more than US\$10 Billion were processed through the system.

Tradocs Benefits

- Easy to use web based interface.
- Easy to integrate with back office systems.
- Secure global solution for all types of customer.
- 24x7 Global Support via Connexion Centres.
- Supports most text based standards.
- Links financial institutions allowing offers of trade finance.
- Packaged solution for rapid implementation.

"Tradocs enabled us to roll out electronic documents to 6,500 suppliers in only 6 months, a fabulous result."

Andy Holmes - Global Sourcing Director, Wolseley Plc

\$21 billion of sales and \$1.3 billion of trading profit in the year to 31st July 2005

White label solution:

A packaged solution for corporates offers rapid roll-out and integration into back office Systems.

Dedicated Web Portals are used to manage and inform suppliers of roll-out.

"Selecting a new IT supplier is something we consider very carefully. With Tradocs, the transition from paper to electronic documents was incredibly smooth. This was down to the lack of software installation, the simplicity of the system and the fact that it is multi-standard, allowing it to work seamlessly alongside our legacy software."

Geoff Bellingham, IT Director, DSG International plc

DSG international trade through 1,450 stores and online stores, spanning 27 countries and employing over 40,000 people.

Interface options

Option 1 - Integration

Tradocs utilises XML and the internet to transmit documents, and our data mapping service will integrate directly into legacy systems.

Option 2 - Web Application

Tradocs also offers an on-line application allowing users to receive and send electronic documents. The Tradocs rapid roll-out model means companies are able to quickly begin sending documents electronically to all their trading partners, regardless of size and system standards.

Tradocs Benefits

- Low cost implementation & roll out model.

Connections to trade finance and logistics

Trade Finance Connectors

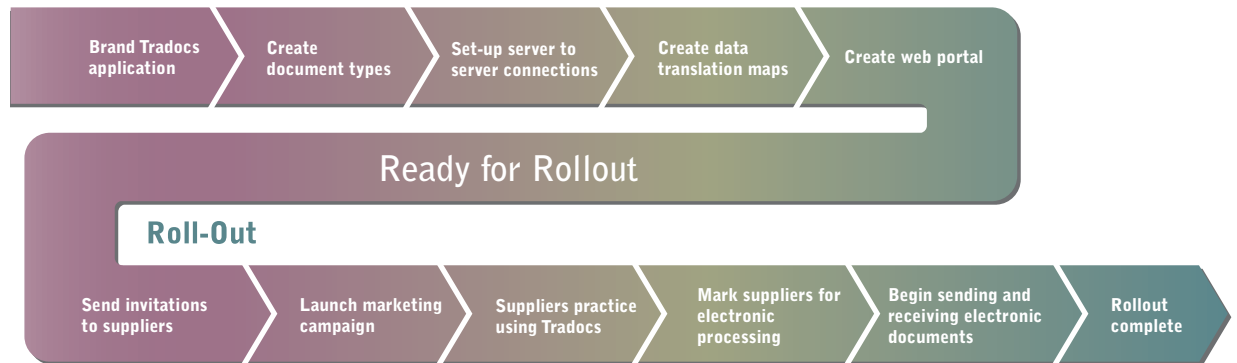

Tradocs has partnered with leading financial institutions to provide trade finance solutions to suppliers. Offers of Finance, Invoice Factoring, Purchase Order Financing, Pre/Post Shipment Finance, Third party risk/ credit insurance. Tradocs is also fully integrated to the SWIFTNet TSU (Trade Services Utility) which provides a multi-bank platform for the provision of supplier finance.

Logistics Connectors

Tradocs has interfaced with leading Logistics Providers to fully e-enable critical supply chain documentation. This enables logistics providers to update supply chain track and trace systems and customs clearance systems using data provided by Tradocs.

Implementation & Roll-Out

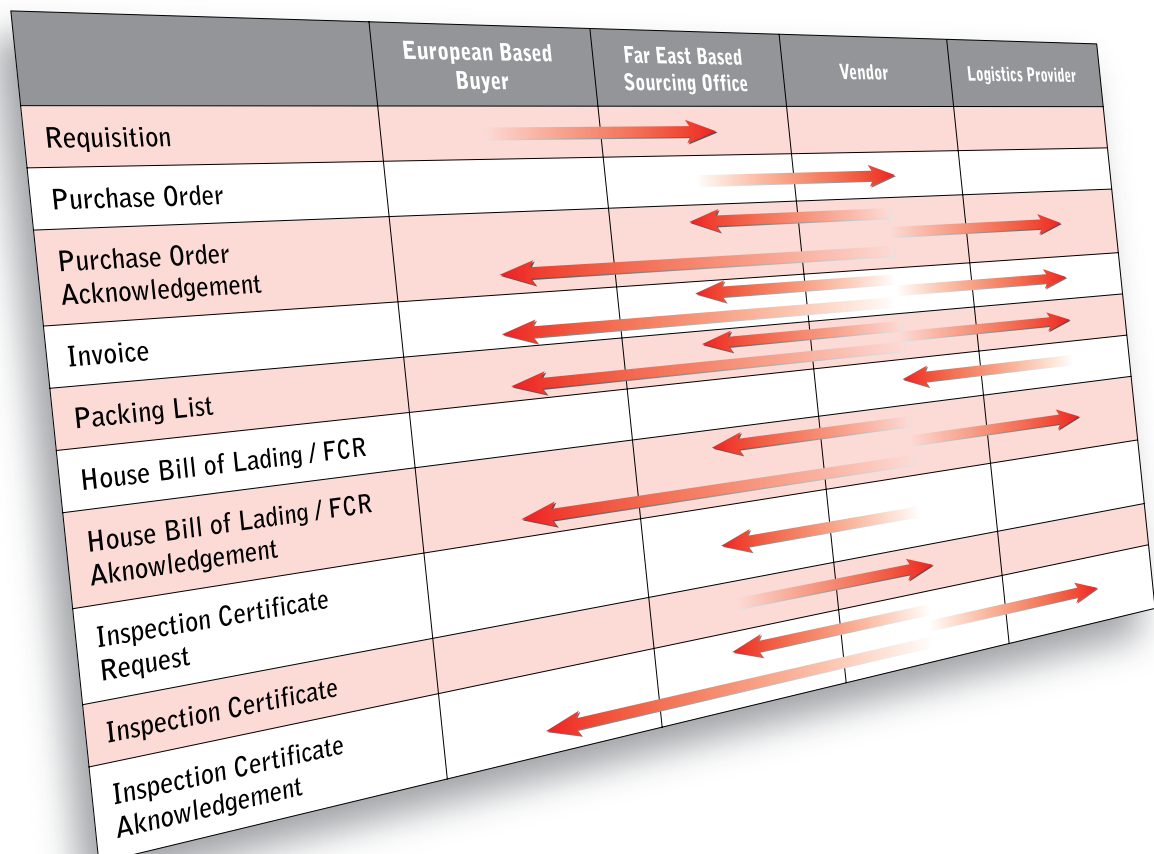

Tradocs offers a fully managed implementation and roll out service to its customers. Using the Tradocs proven implementation methodology, the lead time between integration and roll-out to your suppliers is a matter of weeks rather than months.

6,500 Suppliers in 6 months.

"Tradocs enabled us to roll out electronic documents to 6,500 suppliers in only 6 months a fabulous result."
 Andy Holmes Global Sourcing Director.
